Summary

Self-taught, passionate since childhood about technology and the web particularly, I undertook a career change for web development in 2018. I have since been hired as a fullstack developer in mid-2019.

Today, I'd like to find a company that **matches my values** and to offer my knowledge and experience in the service of a **product that feels truly useful**.

Experience

Fullstack Developer   (JUL 2019 – CURRENT)
deliver.ee

- Bootstrapping and development, with the team, of a new project around planning and billing work shifts, currently in production, with Phoenix (Elixir), GraphQL and React.
- Bug fixes and feature development on a legacy project for managing deliveries with Rails, Grape (REST API), Ember and Vue.
- Take over and maintenance of an existing mobile application for delivery men (and women) with React Native.
- Rspec-Rails test suite optimisation to speed up continuous integration pipelines: 40min ⇒ 5min.
- Complete makeover of a product for editing complex delivery pricing grids with Vue.
- Designing, modelling, and writing technical specs, in collaboration with Product Managers, for the evolution of a large legacy project.

Office Receptionist   (JUN 2013 – NOV 2017)
Charlestown, Par-s-on Assistance, A-SC
